WHAT IS HACK <4> GOOD

Our mission is to provide a fun, rewarding experience for those involved. It feels good to do good; and we want to provide **those with any experience in web design, mobile development, front-end and back-end development, etc. to use those skills to help a not-for-profit achieve greater impact** through the technology we develop. This is more than a one-time event. We provide opportunities for the tech community to continue collaborating on Hack 4 Good (H4G) projects at events throughout the year.
